About myPUPQC

myPUPQC is a platform of Polytechnic University of the Philippines – Quezon City Campus (PUPQC) that assists the needs of visitors, students, alumni, and faculty. It serves as a unified hub that fosters connection, streamlines communication, and enhances the overall campus experience. By bridging the community and the university, myPUPQC ensures a seamless flow of information and strengthen engagement across all sectors of the PUPQC community.

Mission

To be a user-friendly platform that provides academic services and assistance, strengthens communication, and promotes active engagement among students, alumni, and faculty of PUPQC Community.

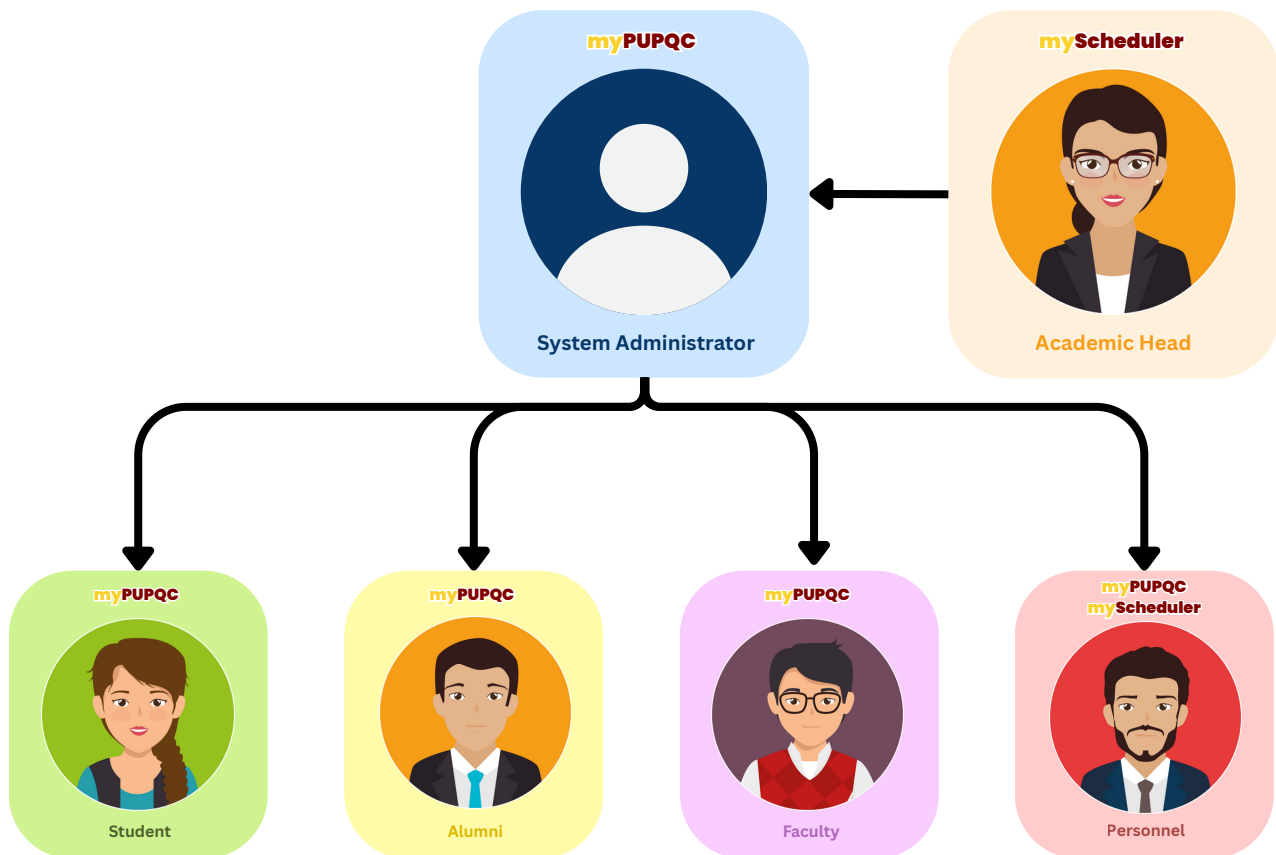

Vision

To be a digital platform that connects and empowers the PUPQC Community through innovative, reliable, and accessible academic services.

Goals

- Make academic services easy to access in one platform.
- Give assistance to student, alumni, and faculty of PUPQC Community needs.
- Keeping the information accurate, secure, and well-organized.
- Build a stronger and more connected PUPQC Community.

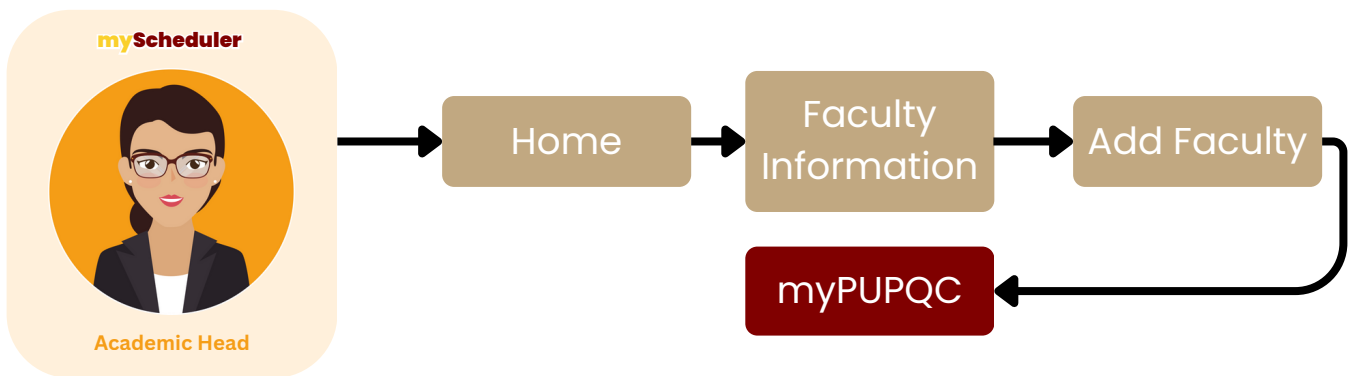

Organizational Structure

- **Academic Head** - the integration happens when Academic Head added a faculty from myScheduler then it will be recorded to myPUPQC.
- **System Administrator** - the System Administrator manages the accounts of student, faculty, and alumni. The System Administrator gives role access to a faculty. He or she also manages the myPUPQC portal.
- **Student** - user of myPUPQC that uses the student services that the portal has.
- **Alumni** - user of myPUPQC that uses the alumni services that the portal has.
- **Faculty** - user of myPUPQC that uses the faculty services that the portal has.
- **Personnel** - user of myPUPQC and myScheduler that uses the academic services.

Processes and Structure

Academic Head

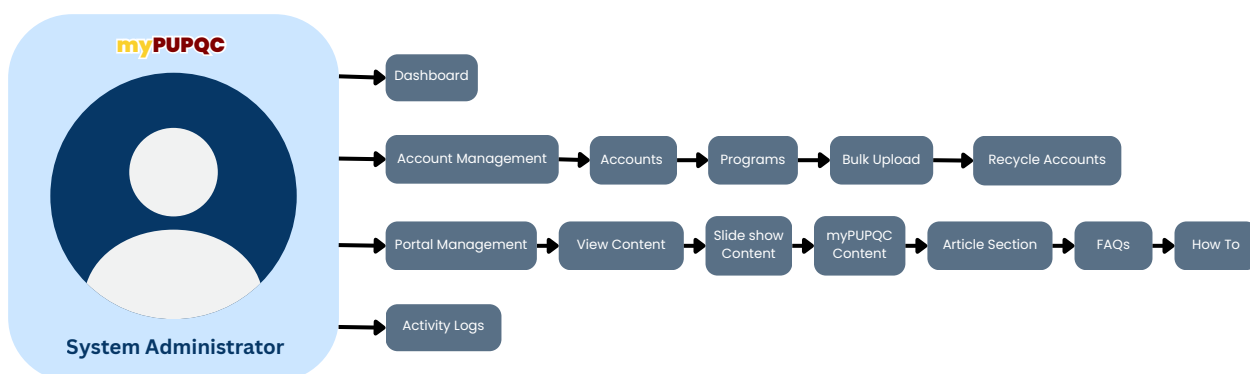

Academic Head Process

- **Audit Log** - The Moderator can view the activity and changes made in the IskaHub.

Processes and Structure

Faculty

Downloadables

- Where a faculty can view and download the files they needed.

About PUPQC

- Where a faculty can view all the information about PUPQC.

My Profile and Settings

- Where a faculty can view the account's information and change Password for security.

Policies and Guidelines

Data Privacy and Confidentiality

All users must follow the rules of the Data Privacy Act of 2012. The system only collects and uses information that is needed for academic purposes. This includes things like teacher profiles, class schedules, and student data. Only authorized people are allowed to see or edit this information. Users must not share, misuse, or access any data they are not allowed to. The university also follows the [PUP Privacy Statement](#) to keep everyone's information safe and private.

User Accountability

Each user is responsible for their own account. You must not share your username or password with anyone. Anything that happens using your account will be your responsibility. Always log out after using the system, especially when using a shared computer. If you notice anything unusual, report it right away to the system admin or the IT office.

System Usage

The system should only be used for official school tasks. This includes setting up academic programs, assigning faculty loads, and managing class schedules. Do not use the system for personal reasons or anything not related to school work. Entering fake information or changing records without permission is not allowed and can lead to disciplinary action.

Compliance with PUP Policies

All users must follow the university's official [Terms and Conditions](#). These explain what is allowed when using the system. By using the system, you agree to follow these rules. Users should also act properly and follow the school's code of conduct while using the system.

Data Accuracy and Responsibility

It is important that all information entered into the system is correct and updated. This includes schedules, faculty names, and program details. Academic Heads and staff should double-check everything before finalizing any schedule or report. Mistakes in the system can cause problems, so it is important to be careful when entering data.

Training and Development

Every user of myPUPQC will find helpful training materials inside their accounts.

1. A **User Manual** is available in the navigation sidebar of the system for the students, alumni, and faculty while it is found in the top navigation bar for the System Administrator. This manual has step-by-step instructions on how to use the system.
2. You can also find **Video Tutorials** link in the User Manual. These short videos show how to use the different parts of the system and are easy to follow.

If you don't have an account yet, you can request your **username and password** from the **myPUPQC System Administrator**.

FAQs and Development

For questions or help, you may contact the Software Research Group or reach out directly to the developers:
